

Changes to the Building Exterior

2.0 CHANGES TO THE BUILDING EXTERIOR

Riverside Drive

The following guidelines for the exterior of the building are neither technical nor prescriptive, however the information are standards intended to help guide proper decisions as they relate to changes made on an exterior of a property. Every part of the exterior, from the windows, doors, metal work, paint colors, and even the placement of utilities affects the integrity of the historic character and architecture of the building. The relationship between the sizes of the lintel to the size of the cornice on a building contribute to the beauty of a building. Every change on a building should be looked at as a part of the entire composition of its façade.
